

FY15 CHNA&HIP Progress Report (February 2014 - February 2015)

Decatur County

Community Health Improvement Plan

GOAL	Strategies	Progress on Strategies
Increase the number of Decatur County residents who ride the public transit for their health care needs within the county from 30 rides to 100 rides per week.	Develop and implement a comprehensive education and outreach campaign to the people of all ages in Decatur County.	Ridership in the county has increased but the trolley continues to only operate in the town of Leon and then there are days scheduled each month that it picks riders up to go to Osceola and Des Moines. Area Agency did a marketing campaign to get riders to use the trolley in Lamoni but there still are none who use it there so the trolley does not currently operate in Lamoni. The Decatur County Hospital has implemented a taxi like system for Medicaid riders who use their facility but do not advertise it. They do it on a case by case basis. Progress continues to be made only in the Leon and surrounding area at this time.
